

# Co Co Jones

In 2006, Co Co Jones released her breakout project, "Super Soul Sista," with the lead single "Anticipating" taking over Urban Radio in the Midwest and Northeast. The project, produced by Grammy Nominated producer/composer Roahn Hylton, set the tone for Jones' image and sound and her path has been bathed in that soulful aura ever since. The lead single became the most requested record in the midwest region and opened the door for Co Co to move to Atlanta GA and link with superproducer and mogul, Dallas Austin. Dallas loved Jones' voice, style and pen game.

After relocating to ATL, Co Co continued penning songs placed on shows such as "Tia & Tamara," "The Bad Girls' Club," "Franklin and Bash", and "the Fast and Furious" Collection DVD release. Her voice can also be heard on "the Wonder Years" reboot. In addition to the licensing and sync placements, she continued to perform and release solo as well as collaborative projects, focusing on live music.

Most recently, Co Co's project "Love, Jones" dropped on December 4th. The project boasts the multi-faceted artists' gift to put words and melodies together, and deliver a vibe through spoken word, rhyme and heartfelt vocals. If you get the opportunity, check Co Co out with her live band experience. The Soul is still alive.
